PROFESSIONAL SUMMARY

Computer Science undergraduate at BITS Pilani with experience building full-stack SaaS applications, scalable backend systems, and AI-powered developer tools. Strong foundation in backend engineering, REST APIs, authentication, databases, cloud deployment, and modern web technologies.

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, Python, Bash

Backend: Spring Boot, Node.js, REST APIs, WebSockets, JWT, Role-Based Access Control

Frontend: Next.js, React, Tailwind CSS, shadcn/ui

Databases: PostgreSQL, Prisma ORM, NeonDB

Cloud & DevOps: Docker, Azure, Redis, CI/CD, Git, Vercel

Authentication & Integrations: OAuth 2.0, NextAuth, YouTube Data API, LLM APIs, Cashfree, Resend

PROJECTS

Resume Auto-Tailor

2026

Next.js, TypeScript, Prisma, PostgreSQL, Gemini AI, Puppeteer

- Built a full-stack SaaS platform that tailors resumes to job descriptions using Google's Gemini AI and generates ATS-optimized PDFs in under 60 seconds.
- Implemented secure authentication with NextAuth (Google OAuth), PostgreSQL on NeonDB using Prisma, and deployed the application on Vercel.
- Developed a server-side PDF generation pipeline using Puppeteer supporting both PDF and DOCX resume uploads, AI-generated change summaries, and downloadable resumes.
- Integrated Cashfree subscriptions with webhook-based payment verification, supporting free usage alongside 7-day and 30-day premium plans.

Projectile Simulation Engine

2026

Spring Boot, Docker, Azure, CI/CD

- Built a high-performance physics trajectory computation backend using Spring Boot with low-latency simulation responses.
- Containerized the application with Docker and deployed it on Azure while implementing automated CI/CD pipelines.
- Designed REST APIs powering a React frontend for interactive real-time trajectory visualization.

YouTube Broadcaster

2026

Next.js, Node.js, YouTube Data API, OAuth 2.0

- Engineered a multi-account YouTube upload and scheduling platform supporting concurrent channel management.
- Built automated publishing jobs with quota-aware scheduling and API rate-limit handling.
- Developed a unified analytics dashboard aggregating performance metrics across multiple channels.

EDUCATION

Birla Institute of Technology and Science (BITS Pilani)

Pilani, Rajasthan

Bachelor in Computer Science

Aug 2024 – May 2028

ACHIEVEMENTS

- Won **1st Place** in the university Web Design Competition for UI/UX execution and technical implementation.
- Active open-source developer with independently designed and deployed full-stack and backend projects.
